

ILLUMINATED SHADOWS

Interactive Projection Wall

This installation uses a motion tracking camera to capture people's silhouettes. The outlines are filled with images instead of shadows. People interacting with the wall can 'reveal' hidden images by moving around in front of the screen.

It's a fun and simple interaction with no barrier to entry. It works in real time with no learning or training needed.

Several themed image libraries are available. See details on next page.

VIDEO LINK 

ILLUMINATED SHADOWS: IMAGE LIBRARY THEMES

Graffiti: Reveal graffiti on clean walls.

Clouds: Skies are revealed, evolve, and change.

Flowers: Bloom and close.

Galaxies: Reveal light from other colour spectra.

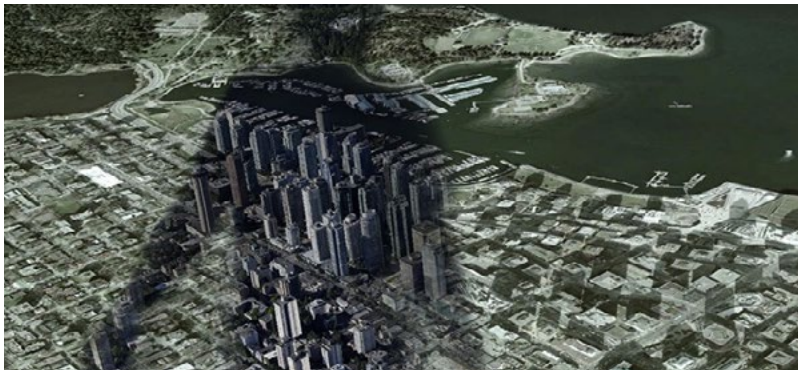

Day/Night: Landscapes change from day to night.

Colourized: Reveal a 'colourized' version of the image.

Maps: Different types overlaid on top of each other.

Science: See the mysteries of the universe unfold.

Custom Themes

Customized images can be created for unique event needs. Our team collaborates with yours to create content that will capture the theme and the audience that see it.
